

10 questions to ask your clinical trial research team

1 How does the treatment in the trial differ from the standard treatment (This is sometimes known as 'standard of care')?

2 How will the trial affect my daily life?

3 What other options are available to me if I decide not to take part?

4 What are the potential benefits and risks of the study e.g. side effects?

5 Will I need to take time off work?

6 What costs will I have to pay if I take part in a trial? If I need my carer or a family member to come with me, will their costs also be covered?

7 Can I talk to other patients on the trial?

8 Will I still see my regular oncologist?

9 If I withdraw, will it affect my normal care?

10 Why can I not continue with the new (experimental) medicine after the trial has ended?

Write any other questions you have in here.
